

ATTENTION: RE-ROOF PERMIT APPLICANTS
EFFECTIVE JULY 15, 2019

The Florida Building Code – Existing Building requires the deck nailing and secondary water barrier to meet the requirements in FBC – Existing Building Code Section 708 when a single family dwelling is re-roofed.

To assure compliance with this section, the City of Lake Alfred performs multiple inspections during the re-roof process. As a permit holder, you are responsible for requesting these inspections.

All inspections must be requested at least one business day prior to the inspection. On the day of the inspection you may call the inspector and ask for a time for the inspection. Once you have your first inspection, the timing for subsequent inspections can be set up with the inspector.

NO SAME DAY INSPECTIONS WILL BE ALLOWED.

Inspections may be requested during normal business hours only by calling 863-291-5748. No faxes or emails.

I have read the above and received a copy of this letter.
